

KRANTHI KUMAR NAGULAPALLY

Enterprise Technology Transformation & Cloud Operations Leader

Cloud Transformation | Platform Engineering | AI-Driven Operations | Technology Strategy
| Operational Excellence | Digital Transformation | Executive Program Leadership

Executive Profile

Enterprise Technology Transformation Leader with 17 years of experience leading cloud operations, platform engineering, DevOps transformation, enterprise governance, and AI-enabled operational excellence. Proven success modernizing technology operations, improving cloud efficiency, strengthening resilience, and enabling executive decision-making through data-driven governance.

Executive Highlights

- Directed enterprise Cloud Operations and Platform Engineering programs across global engineering organizations.
- Led AI-enabled automation reducing manual executive reporting effort by approximately 50%.
- Improved forecast accuracy and reduced unplanned scope changes by approximately 30%.
- Strengthened operational resilience through disaster recovery governance and platform reliability initiatives.
- Built executive dashboards and analytics frameworks.
- Standardized Jira and Jira Service Management governance.
- Led organizational change and automation adoption.
- Collaborated with Engineering, Product, Infrastructure, and Security leadership.

Core Competencies

Technology Transformation: Enterprise Digital Transformation, Cloud Transformation, Platform Engineering, Cloud Operations, DevOps & DevSecOps, Infrastructure Modernization

Strategy & Governance: Executive Program Management, Portfolio Governance, Technology Strategy, Operating Model Design, Organizational Change Management, Executive Stakeholder Management

Data, AI & Analytics: AI-Driven Automation, Executive Dashboards, Operational Analytics, Power BI, Atlassian Analytics, KPI Frameworks

Cloud & Operations: Cloud Governance, Cloud Optimization, Disaster Recovery, Reliability Engineering, Incident & Change Management, Process Automation

Professional Experience

Staff Program Manager | Conga | 2023 – Present

- Directed strategic Cloud Operations and Platform Engineering initiatives.
- Established governance frameworks improving execution predictability.
- Led AI-enabled reporting automation reducing manual reporting by ~50%.
- Improved planning accuracy and reduced scope volatility by ~30%.
- Modernized cloud operating models with cross-functional leaders.
- Implemented executive dashboards and KPI frameworks.
- Supported cloud optimization through operational visibility.

Program Manager | Deep LogicTech

- Led enterprise technology transformation programs.
- Designed governance frameworks and executive reporting models.
- Introduced reusable governance assets.

Manager – Service Delivery | Mindtree

- Managed enterprise cloud service delivery.
- Improved SLA performance and ITIL governance.
- Established executive operational dashboards.

Manager | Cognizant

- Led global delivery and cloud operations programs.
- Introduced automation improving operational efficiency.
- Partnered with senior business and technology stakeholders.

Associate | Capgemini

- Managed SQL Server administration, production support, backup & recovery, and performance optimization.

Key Business Outcomes

- ~50% reduction in manual executive reporting.
- ~30% improvement in planning accuracy and reduced scope volatility.
- ~20% reduction in schedule overruns.
- Improved cloud operational visibility.
- Strengthened disaster recovery readiness.
